

Glass Rail

Glass balustrade.

Glass Rail balustrade system has been developed to provide full safety in residential buildings with minimal visual disruption. This is a fully transparent glass balustrade system compatible with a range of terrace and staircase applications. At this balustrade system safety meets aesthetics, thanks to its design thought to allow full sight line aesthetics with zero visual interruptions, according to today's architectural standards. All vertical components are totally removed to create a complete wall of glass effect. This allows for a total connection between two distinct spaces, transforming the building appearance.

Features

- No vertical components
- Base level fixing only
- Clean lines to enhance light and space
- 16.76 / 17.52 / 20.76 / 21.52 mm glass thickness
- Up to 1100 mm high
- Tested to BS-6180
- Loads up to 0,74 kN
- 4 mounting options available Top U, Top F, Side U and Side Y
- Wide range of colours available

TECHNICAL FEATURES

◆ Design

The transparency of the glass in a railing provides high added value by allowing full visual connection with the outside. The Glass Rail system has a sleek and modern look that meets today's architectural standards.

◆ Features

The **Glass Rail** system connects the interior space with the exterior environment, providing a solution for the most demanding buildings. The glass allows visual connection without interruptions between indoor and outdoor spaces.

◆ Benefits

Glass Rail system has been rigorously tested according UK standards (BS-6180) to ensure maximum safety. It is the ideal balustrade to ensure safety in all kind of residential buildings.

◆ Possibilities

This railing system has 4 options of aluminum profiles (top U, top F, side U and side Y) that allow its adaptation to different mounting options. Besides, it is available in a wide range of colours and finishes with the guarantee of Qualicoat certificate label.

Maximum height	1100 mm
Fixing options	Top U Top F Side U Side Y
Loads (Approved to BS-6180)	0,74 kN
Glass thickness	16.76 / 17.52 / 20.76 / 21.52 mm
